SUMMARY

Computer Science graduate with hands-on experience in full-stack development and AI-integrated applications. Seeking a Software Development role where I can utilize my technical skills, solve real-world problems, and continuously learn and grow within a collaborative environment.

EDUCATION

National University of Computer and Emerging Sciences

Bachelors in Computer Science

2022 – 2026

Coursework: Object-Oriented Programming, Data Structures, Database Systems, Software Design and Analysis, Artificial Intelligence, Software Engineering and Testing, Fundamentals of Software Project Management and Agile project management, Devops, AgenticAI

SKILLS

Technical Skills: Web Development with AI integration, Web Scraping, Task Automation

Languages: JavaScript, C/C++, HTML, CSS, Java, TypeScript

Frameworks and Tools: ReactJS, Node.js, Angular, Next.js, Playwright, Selenium

EXPERIENCE

Internee Full-Stack Web Developer

10-PEARLS

March 2025 – May 2025

- Developed and maintained a full-stack web application using React.js, Node.js, and MySQL.
- Implemented robust APIs, integrated logging with Pino, wrote unit tests using Mocha/Chai and Jest, and ensured code quality with SonarQube.

Internee Web Developer

Zehenify

Oct 2024 – Nov 2024

- Gained hands-on experience in developing and optimizing a web application for E-psychiatric consultation using Next.js.
- Collaborated with the team to implement dynamic features, ensuring responsive and efficient user interfaces.

Data Structures Student Lab Assistant

FAST-NUCES

August 2025 – Dec 2025

- Assisted students in understanding core Data Structures concepts and applying them effectively during lab sessions.

PROJECTS

Enerlytics – AI-Driven Smart Electricity Management System

- Developed an AI-powered smart electricity forecasting platform using Next.js, Node.js, and Machine Learning models including Bi-LSTM, TFT, XGBoost, and MLP to predict electricity consumption and optimize billing for Karachi households.
- Built a real-time forecasting and analytics system with web scraping, weather-integrated insights, slab-aware billing predictions, and interactive dashboards, enabling users to monitor usage trends and reduce electricity costs proactively.

Tactical Talk – AI-Powered Football Tactics Platform

- Developed a full-stack web app using Next.js, Node.js, and MongoDB that delivers tactical football insights via an AI chatbot powered by Open AI.
- Integrated real-time football data (matches, lineups, stats) using web scrapping and built a tactics library with structured formations, enabling deep user engagement and dynamic coaching analysis.

AiR Travel

- Designed a comprehensive Flight Management System to streamline operations like flight scheduling, passenger check-ins, baggage tracking, and real-time flight status monitoring.
- Built using Node.js, Express.js, MySQL, and Angular. Included features like AngularGuard to protect routes.

Additional Experience

Director Corporate Affairs at ACM - Developers' Day 2026
